

## Wilkinson Power Dividers Added to Aeroflex / Inmet Lineup of Products

A new family of Wilkinson Power Dividers has been introduced by Aeroflex / Inmet to complement its current offering of resistive divider models. The new units are 2-way SMA models and are of octave and multi-octave designs covering the popular bands of 0.5-1, 0.8-2.5, 1-2 and 2-4 GHz. All models are currently available from stock.

For more information, or to obtain a data sheet, visit [www.aeroflex-inmet.com](http://www.aeroflex-inmet.com), or email your request to [dividers@aeroflex.com](mailto:dividers@aeroflex.com).

Aeroflex / Inmet manufactures a line of coaxial components including attenuators, terminations, DC blocks, adapters, bias tees and gain equalizers in the DC – 65 GHz frequency range, with 0.5 to 300 Watts of power.
