

TC102 : 5800 Advanced AIDE Programming

This course is intended for people who want to cover aspects of the AIDE software and hardware in a greater depth than in the introductory courses.

It is based on a daily requirement, so the length of the course is dependant upon the material that has been requested to be covered.

Course contents

The specific course contents are discussed in some detail with prospective attendees some weeks prior to the course so that the material covers what is required.

Pre-requisites

It is anticipated that any attendees will have already been on either TC101 or TC103 courses and will have had some time using the system to produce applications.

Other 5800 Courses

TC101 – 5800 Introductory Programming
TC103 – Introduction to Digital testing
TC909 – 5800 Hardware Maintenance
